Dear Mr. Schoenenberger:

On behalf of the Faculty of Medicine, I would like to thank you and your team for your support of our Medical Provincial Academic and Affiliated Campus Technology Project.

MPAACT is the University of British Columbia's innovative, distributed medical education program with support of the Government of British Columbia, the University of Northern British Columbia, the University of Victoria and six provincial regional health authorities. The first of its kind in Canada, the program creates new opportunities for medical education across BC, almost doubling undergraduate class sizes over a period of 10 years.

The successful launch of the MPAACT facilities is a significant achievement; without support from M^oSquared, it is unlikely the Faculty of Medicine would have achieved this significant milestone in the expansion of our medical program.

Your support of this project and the high regard in which you are held by the project team is a measure of our satisfaction with the achievements of the MPAACT project. In particular, your assistance with design and implementation has been noted as a demonstration of how instrumental our collaboration with M^oSquared has been to our success! In this challenging undertaking requiring ingenuity, skill and professionalism, your valued place with the project team has been of critical importance.

Our job is not yet complete but I believe we can take a measure of satisfaction to note that key relationships such as ours are vital in laying a foundation for learning and research. Our medical program is a model of medical education across North America. Together, we are helping the next generation of British Columbia's doctors and health care professionals.

Please accept my sincere gratitude for your contribution.

Yours truly,
